

MOB Data Management and Retention Systems

The Academy will use the widely-recognised The Alpha School System (TASS) as the comprehensive data management system covering all enrolments, attendance, absences, accounting, student, parent and teacher records, reporting and a wide range of other school functions. It will provide the central 'point of truth' for all data relevant to the operation of the Academy.

School survey data and associated documentation will be included in the range of information stored in TASS. The robustness, reliability and commercial reputation of TASS ensures the integrity and security of the data and documents it holds and the security of the system within the Academy will be maintained by having regular and frequent system backups maintained in off-site ('cloud') storage.
